## EXPLANATION OF TERMS

### Object type\*:

admin (level 0-5)

This layer depicts the administrative and political boundaries of the country in question. Level "0" corresponds to the country as a whole, with an increasing level of detail for each successive level (e.g., 2, 3 and so on).

postal (1-7 digits)

This layer depicts the postcode divisions of the country in question. "1" refers to one-digit postcodes, "2" to two-digit postcodes, and so on. The higher the number, the more detailed the depiction of the postcodes.

TT

This layer is based on TomTom cartography.

### Off. code\*\*:

This layer contains labels featuring official regional codes - for example, the official designators of postcodes used by the national postal organization.

### Nat. lang.\*\*\* :

In addition to ASCII-based labels, this layer contains labels in the language (and associated special characters) of the country in question. For some countries local labels are not properly shown in MapInfo, unless the appropriate font is installed or the system's regional settings have been changed to the country in question.
